

The following applications reside in:

<https://github.com/NCAR/lrose-core/codebase/apps>

Purpose	Directory
Lightning algorithms	awc
CIDD and other displays	cidd
Data handling at the file level	didss
Data handling at the server level	dserver
Data file distribution apps	filedist
Radar data filtering	filters
Reading in data from external sources	ingest
Interpolation of surface observations	interp
Manipulating gridded data in MDV	mdv_utils
Reading and handling MM5 files	mm5
Physics algorithms related to meteorology	physics
Process Mapper and related apps	procmapper
Radar algorithms and data handling	radar
Radar Refractivity algorithms	refract

Apps for the SIGMET RVP8 signal processor	rvp8
Satellite data apps	satApps
Utility scripts	scripts
Utilities related to SPDB data bases	spdb_utils
Applications for NCAR S-Pol radar	spol
Generating code for TDRP parameter support (tdrp_gen)	tdrp
Titan storm tracking	titan
Titan analysis	titan_analysis
Field-based tracking for nowcasting	trec
Apps for the RAL X-band dual-pol radar	xpol
